I am an individual who is driven to incorporate Design with Development. Personally and professionally, my diverse background has given me experience to understand design from multiple perspectives and broaden my range in the world of Digital Media.

EXPERIENCE

Upwork – Freelance Front-End Web Developer & Designer

2016 - Present

Manage an array of projects including the development of landing pages, emails, WordPress & Wix sites that often require extensive cross browser testing and debugging. I maintain all websites by updating content, implementing new technology and monitoring performance.

2017 - Present

American Hotel Register Company – Front-End Web Developer

Responsible for all the design and development of web-components, responsive emails, landing pages, microsites and user experience enhancements. I have taken the lead in all cross-browser testing across our digital pieces and applications, and ensure consistency across all projects

2013 - 2017

Lake Forest College – Mail Services Tech Liaison & Manager

As Web Design lead at Lake Forest College Mail Services, I designed & developed our Services page and the University Mail Manager's Association Conference page. I also ensured all programs in our mailroom were fully-functioning and running smoothly.

Jan 2016 - Jul 2016

Baron Chocolatier – WordPress Web Developer/Marketing Intern

I was responsible for the creation and production of all blogs, product photography and ads through WordPress, and studied analytical trends through social media to help with brand appearance.
